RE: Request for Administrative Permit Amendment

Dear Mr. Pampaian:

The University of Idaho was recently issued a new Permit To Construct (P-2008.0079) for the University of Idaho campus in Moscow.

We would like to request that the PTC be activated immediately. Major changes from previous air quality permits include the addition of an existing but unpermitted natural gas-fired boiler, SB-C. Also changed is the relocation and installation of a new exhaust stack for the wood-fired boiler, SB-A.

These changes will be in effect by October 27, 2008. The natural gas-fired boiler, SB-C, is ready to be utilized as a backup boiler this winter, and the new wood-fired boiler stack is currently being installed and should be in operation by the 27th.

Our Tier I air quality permit was renewed last January, 2008, and will need to be updated to incorporate the changes included in our new PTC.

If you have any questions concerning this request, please do not hesitate to contact me.

Thank you.

Sincerely,

A handwritten signature in cursive script that reads "Fred Hutchison".

Fred Hutchison
Director
